

Enrico LATTUADA

Researcher

Date of birth: 28 April 1990
Place of birth: Milan (IT)
Nationality: Italian
Driving license: Italian B

Work experience

Mar 2022 – present

Lise Meitner Post-doctoral Research Fellow

Faculty of Physics, University of Vienna, Vienna (AT) – Prof. Roberto Cerbino group

Project: [Die Nichtgleichgewichtsphysik der kolloidalen Sedimentation](#)

Keywords: sedimentation; non-equilibrium fluctuations; colloidal suspensions; Differential Dynamic Microscopy

Experimental: Study of non-equilibrium fluctuation in sedimenting colloidal suspensions using Differential Dynamic Microscopy with brightfield and confocal microscopy.

Management: Set up a new laboratory (optics, microscopy, chemistry).

Programming: Main developer of fastddm, a Python package wrapping C++/CUDA code, which allows the analysis of Differential Dynamic Microscopy experiments in seconds or minutes on CPU or GPU, compared to the several hours required by existing codes that perform similar tasks.

2016 – present

Research co-Supervisor

Co-supervision of >20 international university students (graduate and post-graduate) from Politecnico di Milano, La Sapienza Università di Roma, University of Vienna, Università Statale di Milano, Massachusetts Institute of Technology (MIT), University of Guanajuato, Institute of Science and Technology (IST) Austria.

Dec 2018 – Feb 2022

Post-doctoral Research Fellow

Department of Physics, La Sapienza Università di Roma, Rome (IT) – Prof. Francesco Sciortino group

Feb 2021 – Feb 2022

Project: Gel di equilibrio di DNA

Keywords: DNA nanostars; patchy particles; equilibrium gels; light scattering; Photon Correlation Imaging

Experimental: Study of spatially resolved local dynamics of DNA nanostars equilibrium colloidal gels using Photon Correlation Imaging.

Simulation: Coarse-grained molecular dynamics simulations of DNA nanostars using open-source software oxDNA.

Dec 2018 – Jan 2021

Project: [DNA-gel](#)

Keywords: DNA nanostars; patchy particles; equilibrium gels; light scattering; Photon Correlation Imaging

Experimental: Design and assembly of a Photon Correlation Imaging (PCI) setup for spatially resolved blended imaging/scattering experiments. Feasibility study for the use of DNA nanostars gels for biomedical purposes, in collaboration with a biomedical group of CNR/La Sapienza Università di Roma/Sant'Andrea Hospital, Rome (IT).

Simulation: Coarse-grained molecular dynamics simulations of DNA nanostars using open-source software oxDNA.

Programming: Development of PCI analysis code in Python/C++/CUDA.

Jun – Oct 2015

Junior Research Intern

Dept. of Chem., Mat. Sci. and Chem. Eng., Politecnico di Milano, Milan (IT) – Prof. Roberto Piazza group

Education

Nov 2015 – Ott 2018

Ph.D. in Industrial Chemistry and Chemical Engineering

Dept. of Chem., Mat. Sci. and Chem. Eng., Politecnico di Milano, Milan (IT) – Prof. Roberto Piazza group

Thesis: [Experimental study of the sedimentation of complex colloidal suspensions](#)

Keywords: sedimentation; colloidal suspensions; gels; centrifugation; optical correlation techniques; velocimetry

Grade: with honors

Experimental: First experimental evidence of promoted sedimentation in systems of particles with strong mutual attractive interactions. Investigation of the settling velocity of binary colloidal suspensions, with focus on the Generalized Archimedes' principle applied to the dynamics, using standard (PIV, tracking) and advanced (Ghost Particle Velocimetry) velocimetry techniques. Compressive rheology study of depletion gels.

Programming: Development of code for experimental setup control (LabVIEW) and measurement analysis (MATLAB).

Oct 2012 – Apr 2015

Master of Science in Nuclear Engineering

Politecnico di Milano, Milan (IT) – Prof. Roberto Piazza

Thesis: [Experimental study of the sedimentation of complex colloidal suspensions](#)

Track: Nuclear Systems Physics

Grade: 110 with honors

Sep 2009 – Sep 2012

Bachelor of Science in Energy Engineering

Politecnico di Milano, Milan (IT)

Track: Nuclear Engineering

Grade: 103/110

Professional and research interests

- Optical methods and their application to soft matter
- High performance computing with CUDA, C++, and Python
- Sedimentation and fluid dynamics
- Structure, dynamics, self-assembly, and phase-separation in complex fluids
- Research and Development, Physics and Chemistry laboratory

Soft skills

- Decision-making and problem-solving
- Project management
- Quick learner (and willing to learn)
- Data analysis
- Communication
- Work in teams
- Creativity

Languages

Italian native
English professional knowledge
B2 level - FCE, grade B
German basic knowledge
A1 level - Sprachenzentrum, University of Vienna (AT)

Schools, Certifications, and Training

ONLINE

Introduction to version control with Git

Microsoft Learn, 7 May 2023

GitHub fundamentals - Administration basics and product features

Microsoft Learn, 11 May 2023

3D Printing and Modeling for Beginners (MK3S+)

Prusa Academy, 6 Nov 2022

Fit4Funding – Your training on EU funding

Austrian FFG, Vienna (AT), 1 Jun 2022

SUMMER SCHOOLS

“Machine Learning for Materials Hard and Soft”

Erwin Schrödinger Institute, Vienna (AT), 11-22 Jul 2022

15th Bombannes Summer School on Scattering Applied to Soft Condensed Matter

Carcans-Maubuisson (FR), 20-28 Jun 2022

1st Summer School on Complex Fluid Flows in Microfluidics

University of Porto, Porto (PT), 10-14 Jul 2017

Fellowships, Grants, and Awards

Lise Meitner post-doctoral fellowship

2022

FWF (Austrian Science Fund) – 177.980,00€

Best poster award

2018

Italian Soft Days 3rd edition, Padua (IT)

Second best communication award

2017

103rd National Congress of the Italian Physical Society, Trento (IT)

Doctoral scholarship

2015

MIUR (Italian Ministry of Education, University, and Research)

Skills and Competences

PROGRAMMING AND COMPUTING

- Python
- C++
- CUDA
- MATLAB (MathWorks)
- LabVIEW (National Instruments)

CAD AND 3D PRINTING

- Inventor and Fusion 360 (Autodesk)
- Solid Edge (Siemens)
- SOLIDWORKS (Dassault Systèmes)
- Prusa Slicer

IMAGE ANALYSIS

- Fiji ImageJ

OPERATING SYSTEMS

- Windows
- Ubuntu Linux
- MacOS

OFFICE SUITES

- Microsoft Office (Word, Excel, PowerPoint)
- Apple iWork

OTHER TOOLS

- LaTeX (markup language)
- Git (Version Control System)
- GitHub
- Blender (3D graphics)
- Origin Pro (scientific graphing)

Bio

I am a Lise Meitner postdoc research fellow working in the Group of Roberto Cerbino at the Faculty of Physics of the University of Vienna. My research interests include the investigation of the structure and dynamics of complex colloidal suspensions using optical techniques and the development of high-performance codes for experiments analysis (using Python and C++/CUDA).

My doctoral work focused on the experimental study of the (natural and forced) sedimentation of particle suspensions and colloidal gels. My investigation of the settling velocity in colloidal suspensions provided the first experimental proof of the promoted sedimentation in suspensions with strong attractive interactions. The results obtained also helped to interpret in a new light the behavior of protein suspensions and the analysis of analytical ultracentrifugation data. As a side project, I also investigated the thermophoresis of amphiphilic block copolymers around the micellization temperature.

During my first postdoc, in Rome, I investigated the peculiar dynamic properties of equilibrium gels made of DNA nanostars – particles having multiple arms departing from a common central junction –, which are able to interact through sticky tips on the arms. The results I obtained proved that equilibrium gels are in fact homogeneous in space, contrarily to standard gels, which form heterogeneous networks.

My current project deals with the experimental study of the concentration and velocity fluctuations in settling and sedimented colloidal suspensions using advanced optical techniques (including Differential Dynamic Microscopy).

I am a highly motivated researcher who is always enthusiastic about contributing to research and development projects. I am eager to collaborate with interdisciplinary teams and am dedicated to continuous learning and improvement, actively striving to expand my knowledge and acquire new tools and skills to deliver high-quality work and make a positive impact.
